

## txtReader.PDF 1.1

The objective is to provide a tool for people who only care to read on their Android devices. txtReader.PDF turns a PDF file into simple web pages for you to read, and there will only be text without any others. As the program is created in my spare time, features are limited, and there is no roadmap commitment. Nevertheless, I hope you could still enjoy it in some ways.

To parse PDF files, txtReader.PDF makes use of PDFRenderer, published by SUN under GNU Lesser General Public License (LGPL). Therefore, I also put txtReader.PDF under LGPL. Any update goes to [samlin001.blogspot.com](http://samlin001.blogspot.com).

By using txtReader.PDF, you agree the license, in short as follows:

txtReader.PDF is free software: you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

txtReader.PDF is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

## Short Manual

Using txtReader.PDF should be quite straight forward, major functions are as follows:

1. Functions accessing by menu, which are not available while loading a file:

1.1 [Open] a PDF file through the File Picker dialog box

1.2 [Index] of the PDF if there is any

1.3 [Page down]

1.4 [Page up]

1.5 [Go To] the specified page no through the Page Number Picker dialog box

1.6 [Info] shows you this PDF

2. Functions accessing by context menu (holding OK key for few seconds), which are reachable at anytime:

2.1 [Font size] setting

2.2 [Background color] setting

2.2 [Font color] setting

2.3 [Text Align Left] for rows

2.4 [Text Align Justify] for rows

## FAQ

How do I pick a color?

1. Rotate the ball by touching & moving till the desired color facing you in the center of the screen.
2. Click the center of the screen to confirm the selection.

How do I navigate File/Index Pickers?

1. Click on the folder/branch to get into the next level.
2. Click on folder/branch name at the 1<sup>st</sup> row to get back one level up.

How is a PDF loaded?

txtReader.PDF loads PDFs/pages in the background thread as it takes time to parse. In the meantime, you will see a progress icon in the right of the title bar. You can still read the current page or change settings while loading.  
Note: a PDF might not be parsed corrected due to the format & encoding.
